

Final Submission Requirements and Judging Rubric

- All code must be open source
 - The application must be provided in a GitHub repository, with the following files in addition to your code:
 - A README file with the following information:
 - An application description
 - Names and emails of all Eligible Individuals on the Team
 - Setup instructions from scratch, including dependencies if applicable
 - Run and usage instructions
 - An open-source license
 - For **compute applications only**: A packaged executable file for windows (.EXE) that includes all functionality for the app to streamline judging and Windows app store submission. A packaged windows app (.MSIX) is also acceptable
 - For **mobile applications only**: A packaged executable file for Android (.APK) that includes all functionality for the app to streamline judging and Android play store submission
- The application must be runnable using your provided instructions.
- The application must be capable of being successfully installed and run on the Copilot+ PC for which it is intended and must function as depicted in the text description.
- The application must be developed and/or commercially ready to the extent that it may be deployed on app store or other open source platform for users to download
- The GitHub repository containing your application must be submitted by 1pm August 7th. To submit your GitHub repository as your Final Submission, you

must provide the link to your GitHub repository via a Microsoft Form submission.

- **(Optional)** The following components are highly recommended but not mandatory:
 1. Tests and testing instructions to verify the app setup;
 2. Notes section containing additional information not covered in the application description;
 3. References used while developing the application;
 4. Well-commented code.

Judging Evaluation Criteria

- Technical Implementation (40 points)
 - Evaluation based on resource utilization, optimization, latency and performance, and energy efficiency
- Application Use-Case and Innovation (25 points)
 - Evaluation through the lens of problem solving, creativity and uniqueness, and user experience
- Deployment and Accessibility (20 points)
 - Evaluation based on ease of installation and use
- Presentation and Documentation (15 points)
 - Evaluation based on the clarity of explanation during the presentation, and code quality and documentation.
